

CANCLINI1925 | RATING

N. 1.0

Rating Certificate issued on January 16th 2025.

AAA

High probability of fulfilling

The Tokens issued by Canclini1925 are classified with AAA rating.

The Issuer, Canclini1925, has a high probability of fulfilling the commitments declared.

The Tokens issued by Canclini1925 are not speculative, they are nominative and personal and issued exclusively to the buyers of services for the blockchain registration of Holders, as per Terms published on the same issuing platforms accessible from the website www.aaatokens.com/en.

The Issuer, Canclini1925, upon the issuance of the Tokens declares its intention to allocate the resources collected for institutional purposes, aiming to promote its own values and provide the opportunity to participate in the research and development of its style and elegance.

The values of the resources collected by the Issuer shall be publicly disclosed with transparency and precision and made accessible on the issuing platforms. The resources collected are conveyed to a single destination account in the name of the Issuer. All uses are communicated with transparency and precision in a dedicated periodic report, publicly accessible from the issuing platforms. The issuing process is high efficiency certifiable, allocating a percentage, equal to or greater than two-thirds of the resources, raised to the intended uses.

The digital processes of issuance and registration take place on dedicated platforms and data are recorded on centralized, encrypted and protected ledgers with high security standards. Digital emission and recording processes are sustainable, low consumption and CO2 production is fully compensated, purchasing carbon credit certificates.

The nature and purpose of the Issues as well as the characteristics of the Tokens offered, the numbers, the values of the collected resources and the uses of all the resources are certified by the Independent Arranger I&B - Marketing Network Milano Srl as consistent with the statements made publicly by the Issuer at the emission phase.
